

PRESS RELEASE**ABEL Mobilfunk relocates to Dietzenbach****Opening of the new "Rhein-Main" branch**

ABEL Mobilfunk GmbH & Co. KG has reached another important milestone: following the successful completion of the construction project at Gottlieb-Daimler-Straße 14, the company moved into its new branch in Dietzenbach at the beginning of September. The new building replaces the previous location in Rödermark and combines modern architecture, sustainable building technology and future-oriented working environments.

Modern new building with a sustainable concept

'With the new location in Dietzenbach, we are creating the conditions for further growth and offering our employees an attractive, future-oriented working environment,' emphasises the management of ABEL Mobilfunk. Over the past few months, a three-storey office building with a large warehouse and integrated work areas has been constructed on a total area of over 21,000 square metres. Particular attention was paid to sustainability and energy efficiency.

- Photovoltaic system from ABEL ReTec with electricity storage for self-sufficient power supply
- Heat pump with cooling function for energy-efficient heating and cooling
- Central ventilation system for an optimal indoor climate
- The new building meets the KfW 40 standard
- Electric charging stations for employees and visitors
- Green roof and façade to improve the microclimate

Ideal conditions for efficient working

In addition to the modern working environment, the new location also impresses with a completely rebuilt and significantly improved IT and network infrastructure. Thanks to powerful systems and high bandwidths, ABEL Mobilfunk is technically well equipped for the future. This technical equipment ensures greater efficiency, stability and future security for all of the company's projects.

The move to Dietzenbach sends a clear signal for innovation and growth in the Rhine-Main region. The new branch not only offers employees more space and state-of-the-art equipment, but also a professional environment for collaboration and further development. With the successful completion of the construction project and the move into the new premises, ABEL Mobilfunk is looking confidently to the future. The Dietzenbach location offers the ideal conditions for continuing to play a powerful and innovative role in the expansion of the mobile communications network in Germany in the coming years.

We wish all our colleagues a good start and much enjoyment at the new location!
